PLEATED DEPTH FILTER CARTRIDGE

SUPAPORE PPG Microfiltration cartridges have been designed as an effective membrane prefilters and as final polishing filters for many liquid processing applications.

Manufactured using 100% polypropylene media, drainage layers and hardware, the **SUPAPORE PPG** pleated depth cartridge offers excellent chemical compatibility across a wide range of liquid processing applications. Its thermally bonded construction ensures minimal extractables and its high filtration efficiency makes it an excellent choice for use in many chemical & water treatment processes. The construction utilises thermal welding techniques to seal all the components therefore eliminating adhesives and extractables and optimising cartridge integrity.

SUPAPORE PPG cartridges use pleated depth media and are available in standard diameter and Junior sizes with micron ratings from 0.2µm to 40µm in the full range of industry standard lengths and end cap styles.

Product Features

- 100% polypropylene construction
- Absolute removal ratings Beta ratio 5000
- Extended life version available
- No fibre migration
- Modular construction
- Standard and Junior configurations
- Materials meet US FDA Title 21 and USP Class VI requirements
- Meets the requirements for food contact as detailed in European Regulation (EC) Number 1935/2004

Suitable for most sanitisation regimes including steaming, autoclaving, hot water flush and most common sanitising agents.

(Note: Steaming, autoclaving and hot water sanitisation must use the glass filled end-cap option)

Amazon Filters manufactures a comprehensive range of filter housings for **SUPAPORE** cartridges including the industrial **50** and **60 Series** and the **70 Series** for hygienic applications. Please consult our Sales Office for further details on the full range.
