

63 SERIES

Multi Stack Filter Housing

The **63 Series** Multi cartridge housing is designed to accommodate 3, 5, 7, 10 or 15 stacks of filters up to 40" long. The centre positioned, split shell opening style is equipped with a Cast Vee clamp as standard for liquid pressures ranging from 7 - 10 bar g. Equipped with the inverted dished end, this free standing housing with split shell design is the ideal choice when using Single Open End plug in style cartridges. The simple to lift off lightweight dome allows full and easy access to the cartridges for rapid changeouts. With the ability to accept both standard Double Open End and Single Open End cartridges, this housing will suit most applications where finer levels of filtration are required. Bolted closures are an option available for all models.

The **63 Series** will accept the full range of Amazon and industry standard cartridges with nominal lengths of 20, 30 and 40".

Note: 7 round housings only accept 66.5mm maximum diameter cartridges.

Product Features:

- Split body design allows easy access to cartridges for filter changeout
- Free standing, easy to install design style
- Vee clamp closures use unique 'W' style seal for reliable leak free operation
- High quality cast Vee band clamps for safety and security
- Cast compression nut with integral PTFE washer for easy, hand tight cartridge sealing
- Wide range of connection sizes and types available
- PED and ATEX Compliant
- DWI Approved product

Accessories	
Pressure Gauge and Vent Valve Kit	
Pressure Gauge and Auto Vent Valve Kit	
Ball Valve and Nipple	

Features and Benefits

- Large selection of housing sizes available so suitable for a wide range of processes
- Integral vent, clean and dirty drains to aid efficient filter changeout
- Each housing is etched with a unique serial number for full traceability
- 'W' style seal for reliable leak free operation
- Cast compression nut with integral PTFE washer for easy, hand tight cartridge sealing
- Wide range of connection sizes and types, cartridge lengths and materials of construction
- Universal cup allows the use of plug in (Code 3 and Code 8) or DOE cartridge styles in the same housing
- DWI Approved product

Product Range

Amazon Filters design and manufacture an extensive range of liquid filtration systems, providing one of the widest selections of filtration vessels, depth filters and pleated cartridges available today, ensuring excellent process and filter compatibility. As one of Europe's leading manufacturers of filtration systems, Amazon Filters is able to offer a solution to meet all filtration requirements. Amazons' filters are manufactured in clean room conditions and all products come with detailed Product Validation Guides and Technical Support documentation.
